

INTRODUCING THE

SLIMKEY-MD™

MEDICAL KEYBOARDS

Designed for the infection control challenges of today's healthcare environment, the innovative SlimKey-MD™ waterproof keyboard is ideal for use in an array of clinical settings. Featuring a sealed, industrial silicone keypad and extremely low-profile keys, the SlimKey-MD™ is easily disinfected using any hospital cleaning agent. It boasts a robust, ABS polycarbonate case and a compact, space saving design. For working in low-light areas, the SlimKey-MD™ is also available with optional backlit keys. Other standard features include 12 function keys and an oversized numeric pad.
