

SK-97-TP

Sealed with Integrated TouchPad

Designed for the infection control challenges of today's healthcare environment, the innovative SK-97 medical keyboard is ideal for use in an array of clinical settings. With the convenience of an integrated GlidePoint™ touchpad pointing device, the new light beige SK-97 is easily disinfected using any hospital cleaning agent. It boasts a rugged, ABS polycarbonate case, a compact, space saving design, low-profile keys, and optional backlighting. Unlike the FL-series keyboards, the new SK-97's have a longer keystroke, which provides for a more tactile feel. They are completely compatible with germicidal sprays and wipes, making them ideal for use in OR's, patient rooms, on carts and at nursing stations.
